>
> Optigen Accession #: 07-4265
>
>
> Test Performed: prcd Mutation Test for PRA
>

- > Test Results: Genotype of your dog is Carrier.
- >
- > Risk for developing PRA: This dog will never develop the prcd form of PRA (progressive rod-cone degeneration form of Progressive Retinal Atrophy). So far, the only inherited PRA disease known in dogs of your breed is the prcd form of PRA.
- >
- > Significance for breeding: Carrier dogs should be bred only to a mate of Normal/Clear genotype to avoid producing pups affected with the prcd form of PRA.
- >
